

Cleans textile ink and emulsion in one easy step

# One Step Clear™

## Ink + Emulsion Remover

Franmar's revolutionary **One Step Clear™ Ink + Emulsion Remover** is formulated for dip tanks to clean ink and emulsion from screens in one simple step. Efficient, economical and eco-friendly, it removes traditional plastisols and UV inks after soaking for only three to five minutes. When the solution is ready to be replaced, Franmar's **Neutralizer Powder** changes its pH for safe drain disposal.

Dip screens in tank

Soak 3-5 minutes

Spray clean

### Mixing Directions:

1. Dilute in dip tank 6:1 (6 parts water, 1 part concentrate).

### Screen Cleaning Directions:

1. Remove tape and excess ink from screen.
2. Submerge screen in solution for 3-5 minutes.
3. Remove screen to washout booth and rinse with clean pressured water.

*Note: Soaking times will increase as solution ages.*

### Tank Cleaning Directions:

1. Neutralize solution overnight.
2. Drain and rinse tank thoroughly before replacing solution.

### Usage Tips:

- **One Step Clear** will last up to 6 months or clean between 300-600 screens before needing to be replaced.
- Mix in the **Neutralizer Powder** when it is time to replace the solution in order to ensure safe drain disposal.

### Dip Tanks

Reclaim your screens in one step using Franmar's dip tanks! These tanks are available in two sizes. The medium tank cleans four standard screens at a time, the large tank cleans five standard screens. Both are made of the highest quality 3/8" copoly material with welded seams, and are quick and easy to assemble. Both feature a spigot for easy draining when it is time to change out the solution.

- Medium Tank: 12"W x 24"H x 24"L
- Large Tank: 12"W x 36"H x 24"L
- Lid and hold-down included
