

Emulsion-safe screen ghost and haze remover

# Haze Remover ES

Franmar's **Haze Remover ES** is the first haze remover that is safe to use on emulsion. Screens can now be cleaned and haze removed prior to cataloging the screen for future printing. It will keep screens looking like new even after multiple runs of prints. Unlike traditional caustic haze removers, **Haze Remover ES** contains no caustic agents and is safe for printers and screens.

## Directions:

1. Clean screen with ink remover.
2. Spray or pour a small amount onto screen haze/ghost image.
3. Scrub both sides of screen with a dedicated Biggee™ scrub pad or nylon brush.
4. Rinse screen clean with pressured water.

## Usage Tips:

- Use immediately after emulsion or stencil removal so ghost/haze will not set in the screen.
- Use Franmar's **D•GREASE™ Screen Degreaser** to remove any residue.

## MORE INFORMATION:

**Precautions:** Dispose of waste according to local regulations. Avoid eye contact. If product contacts eye, rinse thoroughly with water. Call a physician if irritation persists. If swallowed do not induce vomiting. Call a physician. Nitrile or neoprene gloves are recommended for sensitive skin.
